

## Marie Biancuzzo's Online Lactation Exam Review

### Goal

Pass the IBCLC exam on the first try.

### Objectives

1. Recognize how early childhood growth/development and ongoing physiologic processes affect feeding, breastfeeding and lactation. Focus on initiation and continuation of milk production, milk ejection, and milk transfer.
2. Create a plan of care to support breastfeeding mothers and infant/children with pathological conditions from conception until age 2.
3. Within the IBCLC's scope of practice, choose strategies to safely promote initiation, continuation, and perhaps re-establishment of breastfeeding for couples who may be exposed to pharmacologic or toxicologic threats.
4. Adjust interaction with clients and colleagues to promote and support breastfeeding with diverse psychologic, social, and anthropologic beliefs and norms.
5. Prevent or solve problems related to milk supply, milk ejection, and milk transfer.
6. Select, use, and appraise the efficacy and impact of technology as it relates to breastfeeding initiation and continuation. Whether interacting with groups or individuals—clients or colleagues—employ a variety of communication techniques (including electronic communication) to promote and support breastfeeding.
7. Demonstrate compliance with legal and ethical imperatives for IBCLC daily practice.
8. Recognize the implications and advocate for promoting, supporting and protecting breastfeeding as a public health initiative.
9. Interpret research findings as they pertain to the clinical role.

### Materials Required to Complete Course

- Audiocasts & Videos
- Short articles
- Short written and electronic learning exercises
- Brief journaling

### Credits

This learning program does not carry CEUs.

### Expiration

- You will have one year from the date of purchase to complete your program.

### Disclaimers

The author discloses that she has no significant financial interests in any product or class of products discussed directly or indirectly in this learning program (including research support).
