

## Medical Terminology Course Information

This short course will provide you with definitions and learning exercises that cover only a small fraction of what you might need to know in order to get through the IBLCE exam or what you need in your real-life clinical interactions. This course also includes medical terminology that is applicable to situations in adult or infant health (such as *gravida* or *psychosis*). Because some anatomical terms are used in patient's medical records (e.g., *adduction* or *sutures*).

### Goal

Review approximately 154 frequently encountered terms that are directly or indirectly related to breastfeeding and lactation as well as infant/child well-being.

### Objectives

- Given a definition for approximately 154 medical terms, state the correct term.
- Given a crossword puzzle clue with words related to anatomy and physiology, nutrition and biochemistry, breast anatomy, diseases, intrapartum issues and research, provide the appropriate word to solve the puzzle.

### Materials Required to Complete Course

- Video
- Handout
- Learning Exercises

### Credits

This learning program is approved for 2.9 R-CERPs.

- Breastfeeding Outlook is accredited as a long-term provider by the International Board of Lactation Consultant Examiners.

### Requirements for Obtaining Credits

- Complete all required assignments in the course.
- Complete Post-test with 100% accuracy.
